

# Let us help you sell a lifestyle, not just a property!

We are Sand and Salt Creative Arts, a full-service photography and design company, with an addition of some Culinary Arts specialization. Not all photography is the same... some pictures show you a house, while ours create a visualization of your life in this house. We can showcase the special beauty of each property, determine the best features, best angles, best time to show off its beauty or potential.

What can we offer you that others don't? In addition to photographing you and your properties, creating a graphic flyer for your properties, we are also offering our Culinary Arts piece as part of your package. We can include items such as Baked Goods for Open Houses or House Warming Gift. Maybe you have a house that you want to include something more special for an open house? We can offer Mezze or Hors d'oeuvre trays, with Mediterranean, Spanish, Mexican, and other treats.
